

ACCELFIX-S

Lumbar Pedicle Screw System

CREATE
STABILITY

RESTORE
BALANCE

L&K BIOMED

OPTIMIZE

Optimize workflow efficiency by eliminating extra steps and excess instrumentation

REINFORCE

Reinforce constructs using $\varnothing 5.5$ rods and superior screw technology

STABILIZE

Stabilize patients with a broad range of screw sizes

The AccelFix-S Lumbar Screw Fixation System is a posterior lumbar screw system for the stabilization of the lumbar spine made to fit a wide variety of patients

FEATURES

Dual-threaded screws have both cortical and cancellous threading to optimize insertion speed and hold in different bone densities

Sterile packaged implants help reduce surgical site infection (SSI) risk, eliminate back table clutter, and decrease hospital implant processing costs

Minimize tissue disruption with a smaller tulip and rod constructs for better and faster healing

SPECIFICATIONS

Color	Diameter		Length
Gold	$\varnothing 4.5$		30, 35, 40
Teal	$\varnothing 5.5$		30, 35, 40, 45
Blue	$\varnothing 6.5$		40, 45, 50, 55
Green	$\varnothing 7.5$		40, 45, 50, 55
Purple	$\varnothing 8.5$		40, 45, 50, 55

AccelFix-S Specifications:

- Dual-Threaded screws
- Low profile tulip minimizes tissue disruption
- $\varnothing 5.5$ rod system for sturdy construction
- Regular & Reduction heads
