

CastleLac-P®

ANTERIOR CERVICAL PLATE SYSTEM
Low Profile Designed for Patient Comfort

CastleLac-P is a Registered Trademark.

CastleLoc-*P* Anterior Cervical Plate System

Overview

The *CastleLoc-*P** Anterior Cervical Plate System consists of plates and (plate) screws.

All components are manufactured with titanium alloy (Ti-6Al-4V). The plates are available in lengths ranging from 19-97mm to accommodate one to four-level segments of fixation. The system also includes 3.5mm and 4.0mm titanium alloy screws which are available in lengths ranging from 12mm-18mm.

Features & Benefits

*CastleLoc-*P** Anterior Cervical Plate is available in one to four-level configurations.

Bone Screw

- The cancellous-typed screw with multi-optional tip design offers a wide range of choices.
- The fixed or variable-angled screws are designed to resolve the issues of vertebral subsidence.

Fixed Screw

Variable Screw

Indications

The *CastleLoc-*P** Anterior Cervical Plate System is intended for anterior screw fixation to the cervical spine (C2-C7). The System is indicated for use in the immobilization and stabilization of the spine as an adjunct to fusions in patients with:

- Degenerative disc disease (as defined by neck pain of discogenic origin with degeneration of the disc confirmed by patient history and radiographic studies)
- Spondylolisthesis, trauma (i.e. fractures or dislocations)
- Deformity (defined as kyphosis, lordosis, or scoliosis)
- Tumors, pseudoarthrosis, failed previous fusion, spinal stenosis
